Send the request to the office of the Publications Manager (permission@arrl.org).

About the Cover

Scotty Cowling, WA2DFI, tells us about “The High Performance Software Defined Radio Project (HPSDR). This project is a collection of circuit boards designed to help interested builders experiment with the hardware needed to assemble a top performing radio. The latest development is the Hermes Board — a single-board transmitter and receiver that integrates onto one board most of the functions of the boards previously developed for HPSDR.

In This Issue

Features

3 The High Performance Software Defined Radio Project
Scotty Cowling, WA2DFI

14 RF Power Amplification Using a High Voltage, High Current IGBT
Pete Horowitz

21 Locked VCXOs for Stable Microwave Local Oscillators with Low Phase Noise
Paul Wade, W1GHZ

32 Android Wireless Project Control Part 1 — Android GUI Software Development
Thomas M. Alldread, VA7A

38 Upcoming Conferences
