Our Cover

3D printing has so many applications within ham radio, and just a few of them are here on our cover this month, courtesy of Christian Bravo, W4ALF, who has printed an antenna loading coil, a portable Morse code straight key, a dipole center (shown with a BNC connector installed), and an antenna wire winder, among other projects. If you haven't yet taken the plunge into 3D printing, this issue has the information to help get you started, including an introduction to the technology, reviews of printers, and loads of internet resources where you can get free software and projects to print.
